Appendices

RISK MANAGEMENT SYSTEM

The risk management system (RMS) is a set of risk management components (culture, competences, methodology, practices, resources), methods, and processes integrated into the Company's strategic planning and operational management and designed to achieve its strategic and operational objectives.

The RMS relies on the following international and national standards:

- COSO ERM 2017 Conceptual Framework for Enterprise Risk Management: Integrating with Strategy and Performance;
- ISO 31000:2018 Risk Management;
- GOST R ISO 31000-2019 Risk Management.

The Company identifies and monitors risks on an ongoing basis, assessing the effectiveness of its risk management measures and using, among other things, the Company's emerging opportunities for business development and value growth.

Key RMS functioning principles:

- alignment with targets;
- continuity;
- integration and transparency;
- RMS participants' awareness;
- reasonable degree of formalisation and documenting;
- continuous adaptation and development;
- reasonable distribution of responsibilities and powers:
- relevance and expediency;
- training and incentives;
- common methodological procedures.

ORGANISATIONAL STRUCTURE FOR RISK MANAGEMENT

CORPORATE LEVEL

Board of Directors

- Defining principles and approaches to risk management system organisation
- Approving the general policy on risk management, risk appetite, Corporate Risk Map, and key risk management plans

Audit Committee

Preliminary consideration and preparation of recommendations on matters to be reviewed by the Board of Directors

OPERATIONAL LEVEL

President / Executive Board

Ensuring efficient risk management for the Group

Risk manager

- General coordination of RMS implementation and functioning
- Development of the RMS methodology
- Consolidation of information and reporting

Risk expert

- Drafting risk profiles
- Work in 1C: Risk Management
- Methodological RMS-related support to Group employees

Process (risk) owner

- Identification, evaluation, and description of risks
- Development of risk management measures and action tracking

FESCO employees

Risk identification as part of their duties

INTERNAL AUDIT

Internal Audit Department

Evaluation of the risk management system efficiency

DEVELOPMENT OF RISK MANAGEMENT SYSTEM

We keep improving our risk management system to timely respond to changes, both external and internal, maintain strong performance and increase efficiency amid risks and uncertainty.

The RMS is developing in line with an approved plan to 2023.

The following steps were taken in 2022 to improve the efficiency of risk management and introduce a comprehensive risk-based approach to decision-making:

- we developed new risk reporting formats, including a risk register, risk profiles, risk matrix, etc.
- we updated local regulations on risk management;
- we selected and trained risk experts from among our employees;
- we defined risk appetite for 2023;

 we continued to identify and assess new risks and maintained a company-wide risk database relying on 1C: Risk Management.

Priority areas for the strengthening of risk management include:

- integrating risk management into key processes, such as investment planning, budgeting, and risk management in operating and financial activities;
- improving risk data quality by unifying, standardising and automating risk management processes;
- making information exchange more effective.

CORPORATE MAP OF MATERIAL RISKS

Detailed description	Impact assessment / probability	Comment	Risk management
Commercial risks			
Commercial risks are risks of losses arising from external (demand, competition, market changes, etc.) and internal (quality and price of services provided, etc.) volatility	High/medium	In 2022, the impact of risk materialisation was assessed as insignificant. The risk remains in 2023	FESCO mitigates commercial risks through a balanced pricing policy. The management of commercial risks is based on long-term partnerships with counterparties designed to increase the Company's financial stability in the hostile economic environment. Another tool is optimisation of internal business processes in order to respond efficiently to market changes
Geopolitical risks			
Geopolitical risks stem from the US, EU and other countries building up their sanctions pressure, including potential sanctions against the Company, its customers and the industries where they operate, as well as the Company's customers and suppliers exiting the market	Medium/low	In 2022, the impact of risk materialisation was assessed as insignificant. In 2023, the risk consequences and probability are estimated to increase	FESCO operates in strict compliance with the Russian and international laws and constantly keeps track of all regulatory changes affecting its operations. FESCO is capable of promptly adjusting its operations
Operational risks			
Given FESCO's significant transport assets (railcars, containers, vessels, terminals), the management of operational risks is one of the key priorities due to their sheer number	Medium/ medium	In 2022, the impact of risk materialisation was assessed as insignificant. The risk remains in 2023	As part of its risk mitigation initiatives, FESCO repairs and upgrades its assets, invests in new equipment, streamlines shipment structure and refines its control over the quality of asset management and protection

INFORMATION FOR SHAREHOLDERS

SHARE CAPITAL

As at 31 December 2022, the Company's charter capital amounted to RUB 2,951,250,000.

The Company's charter capital is divided into common registered uncertificated shares in the amount of 2,951,250,000 with a face value of RUB 1 per share.

All common shares have the same face value, are registered uncertificated securities and provide equal rights to their holder (shareholder).

In accordance with the Articles of Association, the Company is entitled to place 737,812,500 common shares with a face value of RUB 1 each in addition to the outstanding shares.

DIVIDEND POLICY

Pursuant to the Company's Articles of Association, resolutions on the payout of dividends are made by the General Shareholders Meeting following a recommendation of the Board of Directors. The recommendation is based on the Company's current financial position, taking into account its development plans. In 2022, no dividends were accrued or paid.

EXCHANGE-TRADED BONDS

FESCO fulfilled its obligations in full with respect to BO-01 and BO-02 bonds.

Cash to be paid to holders of 65,345 outstanding bonds was deposited with a notary due to the technical inability to fulfil obligations as stipulated by the issue documents.

CREDIT RATINGS

As at the end of 2022, the Company maintained a BBB+ rating with a stable outlook from the Russian agency National Credit Ratings.
